

A few Communications about Web-based ZOOS' PRINT

From: **Dr. L.N. Acharjyo**,
<Dr.Inavet@yahoo.com>

Thank you for your letter of 12 July 2010 giving enough reasons to stop paper print publication of Zoos' Print Magazine from January, 2011 issue and Zoo Zen from August 2010.

I am a regular reader and occasional contributor to Zoos' Print Magazine/Journal from the very first issue brought out in January 1986 till date and preserved all the issues. I am eagerly waiting to see the last paper print December issue to be released in the last week of this month. During the last 25 years, the ZOO has contributed immensely for growth and development of Indian Zoos.

I have opened my e-mail address (which is given above) so that I will not be deprived of going through your popular Zoos' Print Magazine. I congratulate one and all members of ZOO for bringing out the Zoos' Print Magazine/Journal regularly just in time every month for the last 25 years - a very rare achievement for any organization.

Though on line is the in-thing it has its own hassles depending on the OS one uses; I have never been successful in fully accessing the journal [may be my inadequacy!]. Secondly the current version brought in viruses. Surely there is no substitute for a hard copy!

Thanks for sending me the link to ZOOS' Print online. I think it's a great initiative to only produce this newsletter electronically.

Thanks for the last edition of the Zoos' Print. It was nice to get the latest information on wild life through this magazine. There were news on CBSG and WAZA. It was really interesting the conservation of Elephant in Sri Lanka. I think it is a good idea to send the magazine through email. Magazine on net can reduce the cost and at the same time it can reach the target people within short period all over the world. I would like to convey my thanks to you and your colleagues for this noble efforts.

Dear Sally and Sanjay and all of ZOO, I have to confess that I am one of the people who received this issue of Zoo's Print before, but hadn't even opened it. I am glad that you did send this reminder, because now that I did read it I can only say "Wow"! and thanks.

The issue is an absolutely wonderful overview of CBSG, CBSG-SA, and WAZA! Even for us, it is good to see things like this, as it reminds us how much is being accomplished by our networks and partners, and thereby gives us some more energy to keep going. I don't know how widely Zoo's Print is disseminated among CBSG members, but I will check with Onnie to see if we should send a notice about this issue to everyone. I certainly will

use it as a means to tell some colleagues about CBSG.

Many thanks, and I hope that the year is off to a good start for you. Best wishes,
Bob Lacy, Chair, Conservation Breeding Specialist Group, IUCN SSC

To: CBSG Members

Yes, I could open it just fine. Looks great! Will try and get a chance to read through it when I get the March issue of AKF finished. Are you working in PageMaker or InDesign to put it together? Or perhaps it is coming out of MS Word—I was just curious. The photos look great. Imagine this is the direction AKF will take at some point in the future.

Thanks for sending the link of Zoo's Print. As always it is excellent done and very informative. I personally like the printed version more, because there are too many digital newsletter, which are coming in weekly or almost daily and I prefer to read from a paper more than from the screen. So I have to print it out. I totally understand that it is most cheaper to do that in that style - but I am a fan of printed literature.

Just to let you know that I have seen this and have distributed it accordingly. Yes, I for one read this - some interesting stuff (although signed up to the CBSG myself, so aware, but useful to highlight, obviously). Do always scan to see what interesting information may be available.

It is really amazing to see the photos and its details in colourful pages. It has surpassed the black & white hard copy of the journal. It is an admirable job. With regards

It's excellent and informative. I am giving a quick comment. I will print this documented copy and go through in details and preservation for long period. No doubt it will help the conservation personnel of South Asia. Hope for its future prosperity.
Kind regards

It is greatly appreciated move of ZOO in direction of saving papers and sending soft copies of ZOOS' PRINT Magazine.

My suggestion for further popularization and/or improvement are:
1. Do start creating the other languages versions also. I along with my team could volunteer for Hindi version.... This will not only popularise the noble cause of ZOO but also open a route for large section of population to get involved.
2. Since soft version is now in circulation, therefore, do provide the links of the agencies/ NGOs/ individuals etc. contributed/ mentioned in the magazine so that reader could get in touch with the concerned authority directly.
