

Education Material for Wildlife Week

Dear Colleagues:

Want to make your Wildlife Week programme more special? We might be able to help. The important thing about making Wildlife Week special is actually teaching kids something, instead of hosting them for a meaningless programme sitting and watching older people giving speeches that kids don't understand about wildlife and environment. If you are sincere, you can put on a programme that will change youngsters lives. The key to doing so is activity ... get them into action with drama, with props and your enthusiasm combined with information.

Here is a list of educational material we have on hand right now for Wildlife Week. We are planning to make more but are behind schedule.

We will email and post our regular educators and inform them when things become available. We hope to have an elephant packet that touches on conflict for small kids, some more monkey manners maybe, and who knows what else.

DRAMA AND ACTIVITY

- An Assortment of masks
- An assortment of rakhis
- An assortment of small placards for waving and chanting.

AMPHIBIANS
