

Announcement

UFAW Announces its second book in the UFAW series: Physiology and behaviour of animal suffering, written by Neville G. Gregory

This series is published in collaboration with the Universities Federation for Animal Welfare, an internationally recognized, independent, scientific and educational animal welfare charity.

Written by an expert in applied welfare aspects of physiology, this book is the first to address the physiological aspects of suffering in animals. It explores the different causes of suffering physical discomfort, thirst and hunger, the responses in the body that lead to suffering and it offers insight into how suffering can be managed.

The second book in a major new animal welfare series Draws together information that is scattered across the literature. It is written for the specialist and non-specialist.

Nov 2004/280 pages/illustrated/paperback/ISBN 0632064684/£39.99. Special UFAW members' price £31.99

Other titles in the UFAW series

Environmental enrichment for Captive Animals by Robert Young

This book is the first to integrate scientific knowledge and principles to show how environmental enrichment can be used on different types of animal. Filling a major gap, it considers the history of animal keeping, legal issues and ethics, right through to a detailed exploration of whether environmental enrichment actually works, the methods involved, and how to design and manage programmes. Draws together a large amount of research on different animal Provides detailed examples and case studies An invaluable reference tool for all those who work with or study animals in captivity

Oct 2003/240 pages/ illustrated/ paperback/ISBN 0632064072/ 21.00

Special UFAW members price £ 21.00. **Currently available**

Animal Welfare: Limping Towards Eden By Jhon Webster

Animal Welfare: Limping Towards Eden is Jhon Webster's new and groundbreaking work on animal welfare. Building on his first book, the highly acclaimed Animal Welfare: A cool Eye Towards Eden, it not only critically reviews areas of development, but looks to how animal welfare can be improved in the future. Written by one of the most highly regarded animal welfare scientists in the world. Incorporates both scientific review of evidence with ethical analysis of values-two usually polarized chemes Explains how working protocols can be implemented on farms, in laboratories and in recreation

March 2005/304 pages/ illustrated/ paperback/ISBN 1405118776/24.99

Special UFAW members' price £ 19.99. **Coming soon.**
